

Short term models
Spot market-Long Only
Futures-Long/Short

Highly profitable intraday long/short strategies

Highly robust, improve every underlying

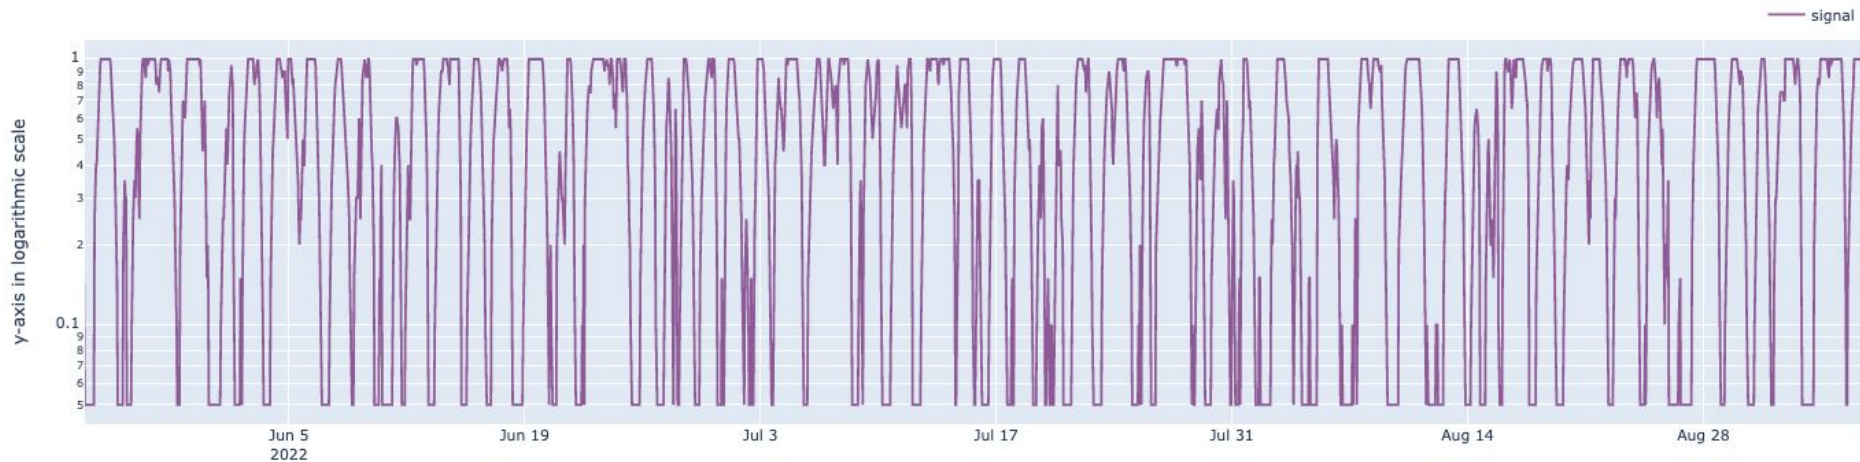

Highly profitable intraday long only strategies
Highly robust, improve every underlying

Models

- Model 1 : Hourly oscillating signal for a quick deleveraging
- Model 2: Hourly RSI cut off

ETH

ETH

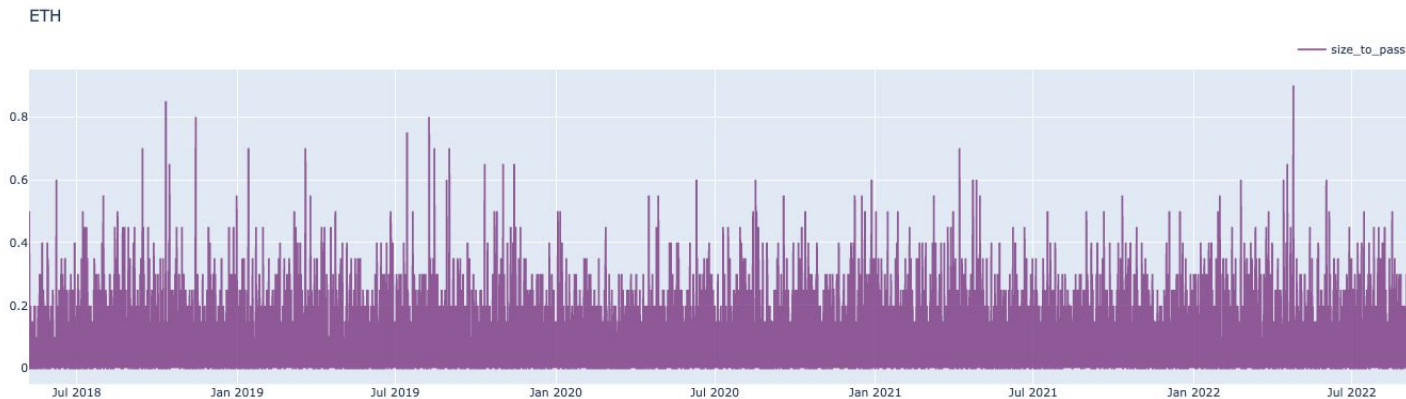

ETH

Metrics model 1

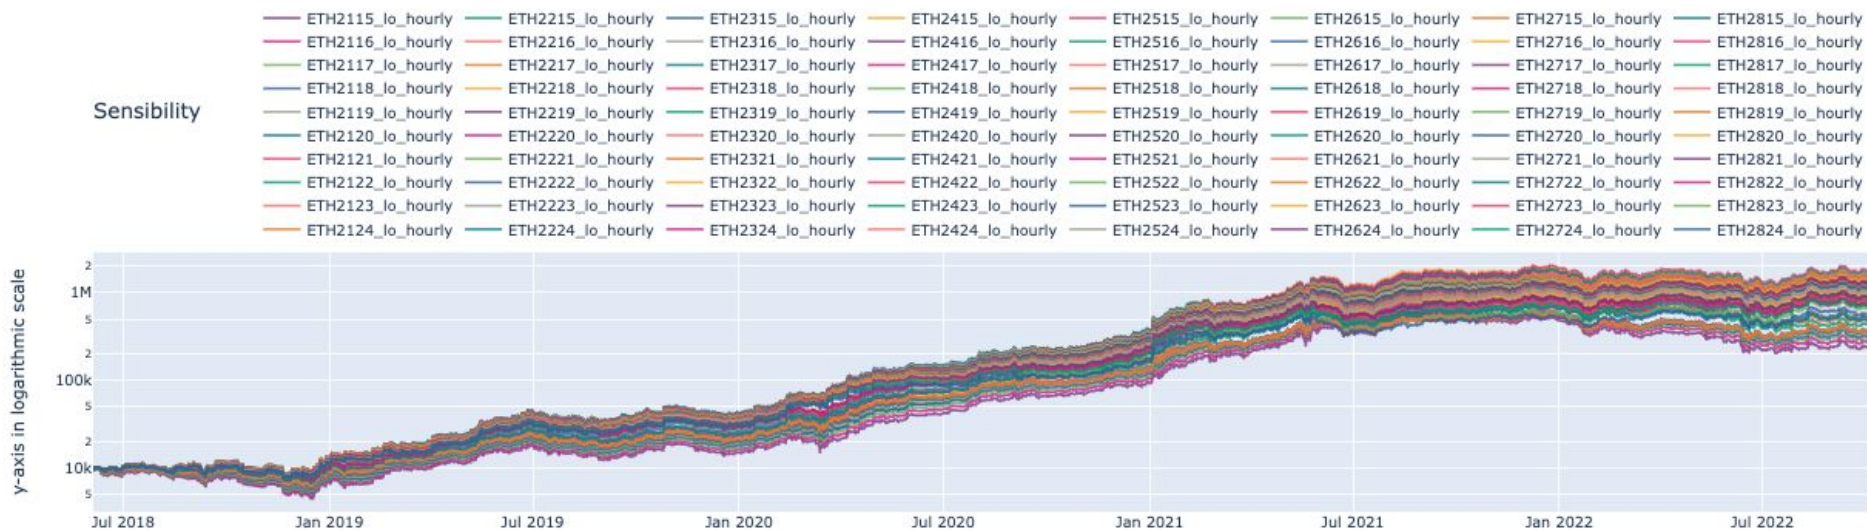

- 10 bps transaction costs hardcoded in backtest
- Average turn-over per hour : 5.6% of the asset
